You see the Export for Web command in Figure 16-2, which is highlighted in red in the lower left of the left screen. Figure 16-2 shows a preview screen of the image before it's been exported. Notice the Export for Web icon at the lower left of the preview screen. Photoshop's tools include more than a dozen buttons and icons on the Tools palette. This must then be used to select columns between var2a and var2b (keep var1 constant). I can't figure out how to combine vars and columns in a single line of code.
