NIGHTSLUG is a turn-based multi-platform RPG with an emphasis on visual design, narrative, and art! The game also has a focus on supporting the gamer, to provide more interaction in your character's life and to ensure the development team can still create content but have a little bit of distance from it! NIGHT SLUG'S OVERWHELMING DÉCOR IS DESIGNED TO BE DIGITAL WITH AN ILLUSTRATION REVOLUTION NIGHTSLUG takes place in a visually stunning 2D retro setting inspired by the golden age of Nintendo and Sega. NIGHTSLUG's retro aesthetics and visuals are carried by a set of blocky, hand-drawn frames that provide a minimalistic, stylized setting, but still able to carry the overall feel of old school games. The simple and blocky graphics are also used to make the in-game environment feel expansive, as it truly is a world of its own, taking place on a (huge) screen with endless space. NIGHTSLUG's world is filled with quirky characters, harsh combat, all kinds of classic RPG humor and dark storytelling. It uses a wonderful blend of classic RPG mechanics, and new systems that add diversity to the gameplay. Some classic

mechanics used are the "Binkam" combat, lever attacks, stat-refinement and a narrative system as well. NIGHTSLUG's narrative is another big feature, inspired by retro games and the importance of the story. The game also includes elements of parody like the "Nightslayer" (the protagonist of the game), its world and the core mechanics. The writer of NIGHTSLUG, Jonathan Romain, has also developed both of his past games (Devotion and Encrypted) and those of his production company, Challenged Games. Jonathan has a passion for creating games that have a strong narrative and great storytelling, combined with nostalgic gameplay. Made with love and care, NIGHTSLUG is a platformer that breathes life into the N-GAGE SNES™ family of products, giving us a game that belongs to all of us, a title you should definitely grab, even if you've never played a turn-based RPG before. About a number of hours. Nobody has ever heard you sound. The sound you made is from the

sea, like the sound of the people in the boat. I have never seen anyone else in your kind, but I have heard many of your kind. And I'm not saying you're worse than the others, as I understand you differently than the others. I can't explain why, but I can't stop thinking about you. And not just about the sound that you made. But I think of you as I feel. I never stop feeling. I get to know you, your face and your voice, and in that, the kindness, the silence. It's all the same to me, so it's okay. It's good. It's kind.It's a world of water, inside and outside. It's hard to tell the ocean and the sea from the sky and the clouds. I have walked with people all my life and never met your kind. You like the deepness of the sea, but you don't like the cold. You like to be the ones who dive in the sea, and when it's too cold, then you find a place that's warm. You have many places in the sea where there is warm sand, and many waves that have cold waters. You need people to help you when the cold in the sea gets cold and turns you into the bottom of the sea. It's better if there are many waves, so that the whole sea can melt and make the cold go

Scouts of America to launch Soccer Referee Training Program Oct. 26, 2019 – Toledo area area can learn new skills on a team this fall as the Boy Scouts of America's (BSA) ToBe the Best! Office of Referee Training announces the official launch of the ToBe the Best! Referee Training Program in the United States. The ToBe the Best! Soccer Referee Training Program is the first of its kind in the nation. Soccer enthusiasts from across the U.S. are encouraged to learn to be a soccer referee through the four-part program. "Starting the ToBe the Best! Program establishes a more practical pathway for referees to use their expertise in the game's highest levels of competition," said Paul M. Paluzzi, executive director of the ToBe the Best! Office of Referee Training. "As an organization that has hosted National Referee Study Congresses since 2010 and signed the resolution United States Soccer Federation resolution in support of official refereeing standards and quality in 2006, the BSA is thrilled to lead in developing national referee training

standards and best practices." The program assumes many of the responsibilities of the organizations that promote and manage local referee accreditation, which began with BSA in 1959 with Accreditation Council For Official Games, becoming the NSCAA Referee Instructor Certification Program in 1987 and NSCAA Referee Student Program in 1994, and continued with the International Grass Court Referee Association (IGCRA), which formed in 1982, and the Women's International Football Federation in 1999. The ToBe the Best! soccer referee training program was developed in conjunction with the United States Soccer Federation and the development of CSP-4. CSP-4 took into account suggestions and feedback from the seven working groups of the FIFA Technical Study Group, which provided the framework for the development of CSP-4, which sets forth a four-tiered system for the evaluation of referees. "The development and production of this four-part soccer referee training program has been led by a group of qualified soccer experts in the U.S. With soccer referee training being one of the game's most critical—and often overlooked—competencies, this groundbreaking program comes at an ideal time," said Antonio Leonessa, BSA's chief certifying officer. "The development and promotion of this program is an additional measurable step towards the goals of growing a more engaged, diverse
