Subsistence is a sandbox, first person, solo or co-op, PvE open-world survival game. Struggle through changing seasons to build a base, develop technology and gear-up in the hostile environment. Defend yourself from wildlife, the elements and AI hunters (who also build bases in the world). Progress your base technology for advanced item crafting and upgrades. Farm crops, fish, raise small animals, harvest and refine resources to rise in dominance in the world. Defend your base from Hunter attacks, and raid their bases to steal their loot. If you enjoy open-world sandbox survival games, resource gathering and grinding to build a base, you may enjoy playing the early access version of the game. Current features: \* Singleplayer and Co-op PvE sandbox experience. \* Crafting mechanics. \* Dynamic base building. \* Dynamic seasons and weather systems. \* Weapon upgrade system. \* Mining and refining of ores. \* AI Hunters (with AI base building). \* Farming. \* Animal husbandry. \* Food cooking mechanics. \* World day-night cycle. \* Temperature change based on time-of-day and altitude. \* Character hunger/thirst/strength mechanics. \* Character clothing system. \* System for inviting/removing players to access bases. \* Central power system for bases (base items require power to function). \* Npc enemy leveling system. **DISCLAIMER (PLEASE READ):** The public Early Access is intended for those interested in supporting the project and participating in its continued development. You will most likely experience balancing issues, performance issues, bugs and missing features. If you are looking for a complete gaming experience, I would recommend allowing some time before trying out the game. There are many YouTube game-plays showing the current state of game. I am the sole developer of the project, which I work on as a passion project. I feel this is important to mention, so that those considering playing the game can make a more informed purchase decision. A full detailed list of the updates since launch can be viewed here: of the project: The aim is to integrate the kinds of base-resource micro-management typically found in RTS titles, into a boots-on-the-ground shooter. Each base has an underlying economy of power and raw materials that must be maintained and expanded in order to rise in dominance. The focus is not of primitive survival

How to play? Tennis World Tour 2 is a free-to-play tennis game featuring a new story-driven campaign set in Madrid in front of the Roland Garros arena during the 2017 edition of the French Open. The Roland Garros tournament is the second biggest event of the year and the world's most prestigious tennis tournament, started in 1891. The player, inspired by a beautiful love story, seeks the winner of this tournament, after falling in love with the court he matches and works. The player can play with or against opponents in single-match, double-match or relay games. If one or more players are eliminated from a single match before the end, the next player eliminated from the match wins the point. The player can also play doubles or relay (a match with two players in the singles line, each team alternating one half of the singles line), a mode that is commonly known as team tennis. Game mode You will be able to play the following game modes: • Match: You will be able to play with or against opponents in a single match, double match and relay. • Doubles: You will be able to play against opponents in doubles. • Relay: You will be able to play against two or three opponents, alternating each end of the singles line. • Quick Match: You will be able to play against three opponents in quick match. • Quick Tournament: You will be able to play against three opponents, one after the other, in quick tournament. • Exhibition: Practice your shot techniques and skills in an exhibition match. • Tour career: You will be able to play multiple matches against computer-controlled opponents, to win points to extend your ranking and climb in the world. There are also game modes that will be available depending on the player's progress: • Challenger: You will be able to play against computer-controlled opponents, climb in the world ranking and extend your career as you progress in the challenge rankings. • Challenger Master: You will be able to play against computer-controlled opponents and the game will be increased in difficulty. • Master: You will be able to play against computer-controlled opponents and the game will be increased in difficulty, climbing in the world rankings. There are also game modes that will be available depending on the player's level: • Beginner: You will be able to practice in a relaxed environment, climb in the level rankings and play against

### What's new in UNPLUGGED - Artbook Volume I:

... Chichester 2 : The Project It is a series of short stories which, in one way or another, look at how the town of Chichester might appear and act in the year 2026. The stories are (mostly) set in Brighton, S.E. 10 miles distant, but not always. Many, actually, are set in the town of Londonderry, 10 to 15 miles distant, between Crawley Down and Warminster, but still within reach of London. The stories reflect the thoughts, opinions and experiences of a variety of strange, dreamers, outsiders and visionaries - people who have imagined different lives for themselves and those around them. Some exist within the world today, others emerged from a burst of unrealised ideas from the past. But whilst Places like Brighton can be described with the same words that are used to describe the real or imagined places in Chichester, none were really written with the same aim or intent. Ultimately, as is the case in Brighton, these stories also reflect where we are today, but with a modern context. Selected writer builds 'in the real world' on Facebook New writer approach to Social Media - blog and Facebook The One That Got Away 4.9 | 23/09/2009 It was with a great deal of dismay, that I encountered my first cars, when I started skating. God only knows how I ever got to the big smoke in time, but no one ever taught me how to drive. I had never even seen one. Well, that's not quite true. I had seen them from a distance, and thought them very neat. They were also, rather terrifying, unless you happened to be standing on your house's roof in the vic- tim of a huge one-way weight training accident in the main road. Having paddled out to the side of the road, I had never considered what I would do if I met one of them rolling past on the way to somewhere just an inch from a skater's severed leg. No, if I had imagined that anything would ever happen to me I had never given a thought to a skater being involved. Neither had I thought that something quite so extreme would happen to a skater, even as an accident. I mean, I had visions
