I tried this one, and it worked but I am facing a different problem.I have downloaded and installed the CTP. Everything was good and installed successfully but the product registration key refuses to register. I have tried installing several times with different serial numbers and keys, however, it always fails at the same point. I dont know if I am doing something wrong or not. Any help would be appreciated. A: Download and save the CTP to your desktop. The new key will be stored there. Open the CTP and click on registration. Enter your serial number and click next. Check the box for the "Use for all copies of this computer" option and click on "Next". Click the button below the serial number field and save the key. Close the CTP when done. Q: VB.NET Image to Byte Array I am using the following code to load a Png image from a Stream and then place it into a byte array. When i examine the byte array with a debugger, however, it seems to be corrupt. Any idea what I may be missing? Dim bitmapData As Byte() Using ms As New MemoryStream(File.ReadAllBytes(myPath)) ms.Seek(0, SeekOrigin.Begin) Dim bitmap As Bitmap = Image.FromStream(ms, True) bitmapData = bitmap.LockBits(New Rectangle(0, 0, bitmap.Width, bitmap.Height), ImageLockMode.ReadOnly,
